COMMITTEE FOR THE STUDY OF ECONOMIC AND MONETARY UNION

λ

CSEMU/8/89

Jack January 1889)

Summary of replies to Governor Hoffmeyer's questionnaire

	Can under presen	an under present provisions policies decisions be:				
Replying country	communicated prior to implementation?	taken after consultation?	taken after co-ordnation?	transferred to Community bodies without changes in national legislation?		
Belgium	yes	yes	yes/no ¹	no/yes ²		
Denmark	yes ³	yes	yes/no ¹	no		
France ⁴	yes ³	yes	yes/no ¹	no		
Germany	yes	yes ⁵	no	no		
Greece	Yes 3	yes	yes (no 6	hu		
Ireland	yes	4.1	yes	ho		
Italy	yes ^{a 7}	yeső, 7	yes ^{a,7}	no		
Luxembourg	yes ³	yes	no ^{x 8}	no		
Netherlands	yes	yes	yes	no		
Portugal	yes ³	yes	yes/no ¹	no		
Spain	yes	yes	-8-9	no		
United Kingdom	yes	yes	yes/no ¹	no		

1 All policy decisions except those relating to tax changes can be taken after consultation.

² With the exception of changes in intervention credit mechanisms, intervention policy and management of official reserves, no other decision-making power can be transferred under present legal provisions.

3 Government proposals on fiscal policy measures can be notified when tabled.

4 Communication, consultation and co-ordination are assumed to take place between ECpartners in a forum where full confidentiality is assured.

5 Consultation not binding decision-making bodies.

G

- In the case of changes in direct taxation only at the moment when the Government proposals 7 are presented to Parliament; consultation and/or co-ordination have to take place at Government level; the Parliament may still modify Government proposals. X

Y "No" in case co-ordination implies mandatory consideration of others' concerns.

Left unanswered because the meaning of co-ordination is not clear, i.e. whether it might **'8** ς involve the transfer of sovereignty to the Community bodies where policies would be coordinated.

All poling themans velaler to bird poling, linening of some une oliberts, government delt memogeneet, income poling and eved & poling cannot be liken after construction.

Summary conclusion:

Broadly speaking the replies to Governor Hoffmeyer's questionnaire lead to the following two conclusions:

Firstly, all countries can under present provisions communicate policy decisions prior to implementation (although some countries pointed out that tax changes could be communicated only after having been tabled) and take policy decisions after (non-binding) consultation. There is equal unanimity that decision-making power cannot be transferred to Community bodies without changes in national legislation.

Secondly, no clear answer emerges whether under present provisions policy decisions can be taken after co-ordination. The main problem appears to relate to the meaning of coordination: if it does not imply mandatory consideration of others' concerns the answer would generally appear to be yes (perhaps, with the exception of tax changes), but if national decisionmaking would be subordinated to (binding)co-ordination, a number of countries would seem firstly to have to enact changes in their national legislation.

Explanatory note

BT049p

According to the Dutch Central Bank law the Nederlandsche Bank can be subjected to an instruction by the minister of Finance. At the same time, the law lays down elaborate procedural safeguards embodying checks and balances, which in practice induce Minister and Bank to consult frequently, in order to arrive at a consensus on the general stance of monetary policy. The implementation of the concrete measures is decided upon by the Bank and the Minister is informed beforehand, e.g. in case of a change in the discount rate. Measures of credit policy, such as ceilings or cash reserve requirements, require agreement with commercial banks; if such agreement cannot be reached the Bank may impose the measure on the banks if the minister of Finance agrees, pending ultimate approval by Parliament. The power of the minister to issue, within procedural safeguards, an instruction prohibits the transfer to the Committee of Governors of decision-making power on Central Banking matters within the present institutional context. The position of the Executive Board as the governing body of the Bank also forms an obstacle to the transfer of authority.

The financing of government deficits and government debt management are in the Netherlands within the competence of the minister of Finance. However, the Central Bank cannot be obliged to finance the government. Furthermore, there is an understanding with the Bank that the Treasury will refrain from monetary financing by other means. Fiscal policy measures require approval by Dutch parliament.

In completing the questionnaire, it has been assumed that in the stage 'decisions taken after coordination' recommendations can be made at the European level and that recommendations within the Central Bank's competence are made in the Committee of Governors, an EC-body that is not subject to directives of the Council of Ministers. It should be added that progress in monetary policy coordination requires that all Governors participate in the coordination process on more or less the same footing, i.e. equally independent from instructions of national ministers.

Transfer of decision-making power constitutes a transfer of sovereignty that will necessitate parliamentary approval of the Treaty in which this is stipulated and probably corresponding changes in national legislation.

BANCO DE ESPAÑA

RI. GOBEHNADOR

Madrid, December 22, 1988

pr. Erik Hoffmeyer Governor Danmarks Nationalbank COPENHAGEN

Dear Governor Hoffmeyer,

Please, find attached herewith the table that you have proposed, duly filled with the answers relative to Spain. 1 am sending a copy of it to other members of the Committee and to the two Rapporteurs.

Naturally, decisions-making is a more complex reality than might be reflected by the formal procedures to which the answers in the table correspond to. You might, therefore, find useful the following brief description of responsabilities in Spain.

Monetary policy

Formally, general monetary objectives, including annual monetary targets, are set by the Government. In practice, however, they are formulated jointly by the Government and the Bank of Spain after extensive discussion and consultation. Thereafter, responsability for the execution of monetary policy rests with the Bank of Spain.

On the other hand, decisions on government financing and the issuing of government dept rest ultimately with the Government. On that point, it might be recalled that the Government may eventually decide to use the Treasury access to credit from the Bank of Spain to which it is legally entitled. Under present provisions, the resulting Treasury's outstanding borrowing from the Bank at the end of the fiscal year is limited to 12% of the year's total budget outlays.

Exchange policy

The basic medium term orientation and objectives of exchange policy are set jointly by the Government and the Bank of Spain. The Bank is thereafter sole responsible for

2.

the management of exchange policy, including intervention and regulation of foreign exchange markets. The Bank of Spain is equally sole responsible for the management of external reserves.

As you are aware, obligations stemming from the exchange rate mechanism of the EMS do not currently apply to Spain. Such obligations could however be accepted in the future without need of changes in the present Spanish legal setting.

Fiscal policy

All decisions on taxation and on the Public Budget must be enacted by Parliament under the proposal of the Government.

Additional observations

There is a need for further clarification of the meaning of "coordination of polidies" since it is unclear whether coordination might or might not involve the transfer of sovereignty to the Community body where policies would be coordinated. I have, therefore, left unanswered column 4 of your table.

Yours Sincarely,

Ŷ

The Governor

Dr Erik Hoffmeyer Governor Danmarks Nationalbank DK-1093 Copenhagen K Havnegade 5 Denmark

Jear Like

I was very interested to see the pro forma on economic policy measures and instruments which you enclosed with your letter of I had seen the table, together with a copy of your 11 November. letter of 26 October to President Delors, before our November meeting and I had hoped that we might have been able to discuss it The completed example you have given does appear to then. provide a clear picture of what degree of consultation or co-ordination is already possible in the case of Denmark and what would require more difficult political steps. Unfortunately it is very difficult for the situation in the United Kingdom to be adequately reflected in a tabular presentation which focuses on formal procedures or statute since these play little part in our Nevertheless, I think what you are hoping to demonstrate system. in this way is very important to our Committee's work. I have therefore attempted to complete the table as far as possible, but you may find it helpful also to have the following description of where decision-making responsibilities lie in the UK.

Monetary Policy

Monetary policy is formulated jointly by the Government and the Bank of England, and executed by the Bank of England. Thus the detailed decisions on market operations, including at times those involving the rates at which the central bank deals, rest with the Bank of England. Any decisions involving the creation of new issues of Government debt rest ultimately with the Government. All of these decisions could in principle involve prior communication, consultation or co-ordination with EC partners; only the creation of new Government debt is a matter directly governed by national legislation, which gives very wide scope for discretionary decisions by the Government.

Exchange Rate Policy

Those questions relating to the exchange rate mechanism of the EMS are not currently applicable to the UK. As with monetary policy, exchange rate policy is formulated jointly by the Government and the Bank of England and executed by the Bank. It nevertheless has to conform with the statute governing the operations of the Exchange Equalisation Account so that, whereas prior communication, consultation or co-ordination of operations with EC partners could take place, decision-making power could not be transferred without a change in legislation.

Fiscal Policy

All decisions on taxation must be enacted by Parliament, which also has to approve the supply of money to finance most items of public expenditure. In both cases, the proposals are made by the Government, which will guide them by the formulation of a fiscal strategy - as currently, in the MTFS. The strategy to be followed by Government could, without change to national legislation, be a subject for consultation or co-ordination with EC partners. Individual tax proposals could not be the subject of prior open discussion, because of the risk of forestalling.

I am sending copies of this note to other members of the Committee.
