

{ 21/28 March  
final editing meeting }

Ask Cem for paper on fiscal balances

(Working session on 26 Jan)

- operation of Wann R - definition;
- Feb. meeting

what remains to be discussed?

27/28 Feb.  
writing session  
with Possibilities

26 Jan  
working session

→ a warning saying these conditions must agree with the Anglo-German

but saying these conditions are dangerous, although it may take some time, which will allow Edens!

— have a report in March!

Annex = no position paper

- single market, plus agricultural policy, common foreign policy, common external tariff

Economic  
Union

- common policies to enhance the efficiency of community  
funds for Brussels package; equalized distribution of resources  
in all regions

increased coordination (as reason of policy-area  
to maximize growth + stability)

not only regional ~~or~~ policy

2 areas has been explored, then discuss what to do in the  
third area;

Regional policy → function of central bank; not too much  
through official channels, i.e. through the C Bank

EU countries closer coordination, how far?

the reinforcement of coordination improves itself by capital  
movement. This was achieved without further coordination

then in the scheme leading to 1982 the main question  
was itself that were in the control of ECSC!

closer coordination is a agreement of 1982 [End of Part I]

Then come to three strands of EU

and can have an budgetary aspect.

Under Part III with a much larger horizon

European Council  
Partititional function: ECIS must give report to ~~Parliament~~ ~~Minist.~~,  
and not to EP

European  
~~to avoid of  
problem of  
accountability!~~ ← [Council has to examine every year  
the state of ec. + monetary;  
to function its development and progress

an EC → ec. decision centre → Commission, <sup>Cofin Min, Fin Com</sup> or unitation of Commission → European Monetary process,  
but Commission no power,  
this cannot continue,

~~obviously~~,  
if Commission wants to unite  
each ~~sector~~ economic & etc., Council  
& Financial (Euro) Council  
at least; also Parliament of European  
Council

an institution → no new ec. institution

→ confirmation of existing institutions  
but in a scheme of  
more general coordination +  
transparency

multilateral budgetary

in the final place not only the Ipotex or  
but also the C budget;

2 papers: by DG II

→ <sup>objection</sup> if present continues to ECSC; what does it  
add to 1982;

→ an economic pol. putting things right;

### Emerson:

Mr. Richardson  
of ec. policy  
panacea  
18th Dec.

on regional funds →  
financial transfers important but  
not sufficient; moreover the help to  
develop the particular resources that where  
exist, there may also be some  
peculiar problems.

but there are limits of experience has  
shown! help for a/c. help

8<sup>th</sup> breakfast  
at Holborn

Feb. 2

- 3 ppw
- monetary approach,
- regional
- macro-fiscal

schemes A & B?

## fixed policy rule

- why fiscal consistency is necessary?
  - method mechanism
  - why cannot they not work (in general)
- annual adjustment in C
- cooperative fiscal systems → what can/should
  - problems for the C
    - sufficient currency area
    - small C budget
  - possible solutions

15 pages

written by Chairman

4.1.89

Macro-fiscal functions performed by the Centre for economic policy coordination

- 1) Establishment of limits on national budgetary deficits and rules governing their financing; these binding limitations should be recognized by changes in national legislation in accordance with provisions agreed in the Treaty.
- 2) A one-time consolidation of budgetary positions in those countries which lie outside of the limits stipulated under 1)
- 3) Annual coordination of budgetary policies (within the framework of setting the Community's macro-economic policy-mix), leaving the possibility of temporarily waving the limits stipulated under 1)
- 4) Harsh procedures aimed at exerting peer pressure on countries which in the course of executing their budgets deviate from the agreed objectives; this would involve, for example, special meetings.

4.1.89

Relationships between ESCB and CEPC

1. Appointments

- . Ecofin appoints members of the Board (?)
- . European Council appoints President of ESCB (?)

2. Annual accounts

- . Annual accounts are presented to.... and approved by...
- . Profits (losses) accrue to the [Community budget]

3. Policy

- . Annual session of monetary-fiscal policy coordination between ESCB and CEPC
- . [quarterly] testimony of the President of the ESCB before PE-Committee
- . right of the [President of the Commission - President of Ecofin Council] to participate in the Council of ESCB.
